

US ID #	USER STORY
Basics	
1	As a player, I want to play a blackjack game against the dealer. Each game is implemented with a gambling system for the non-dealer player.
2	As a player, I want to start the game with one thousand dollars in balance.
3	As a dealer, I want to never run out of balance.
4	As a player, I want to be able to bet as much money as I have in my balance.
5	As a dealer, I want the minimum bet from the player to be 1 dollar.
6	As a player, I want to add cards to my hand from a deck. Each deck is populated with 52 cards (4 suits and 13 cards within each suit), refilled and shuffled at the start of each round.
7	<p>As a player, I want to be dealt with two cards from the deck at the start of each round. Each card is designated with a suit (“Diamonds”, “Hearts”, “Clubs”, or “Spades”) and a value:</p> <ul style="list-style-type: none"> ○ numbered (2-10) have the same point value. ○ a face (Jack, Queen, King) has a point value of 10. ○ an ace has a point value of 1 or 11, whichever is better for the player.
8	As a player, I want to have the option to make a move of one of: “Hit” or “Stand Pat”; I want to be able to hit until my hand exceeds 21.
9	As a dealer, I want to hide one of my two cards from the player at the start of each round, leaving the player with incomplete information about the state of the game.
10	As a dealer, I want to hit when my hand is 16 or less; I want to stand pat when my hand is 17 or more.
11	As a player, I want to win when my hand is 21 (natural/blackjack) or has more points than the dealer but less than or equal to 21.
12	As a player, I want the dealer to pay one and a half times my original bet when

	my hand is natural with 21 unless the dealer's hand is also natural.
13	As a dealer, I want to win when the player exceeds 21 or if my hand has more points than the player but less than or equal to 21.
14	As a player, I want to be able to exit the game after a round or when I run out of balance to continue.
